

WAX RECOMMENDATION **TOKO**[®]

Rendezvous Pass Hill Climb

Cub Creek Trailhead Winthrop, Washington

Monday March 8-14th, 2021

Self Scheduled Event Final 3 Days

Wax tips for March 19-21, 2021 assuming an 8 AM Start

Approx 7K Free Technique (See website for details)

<http://www.methowvalleynordic.com>

Forecast/Conditions: A 14" to 30" fully transformed snowpack groomed daily at near freezing temperatures exists. Overnight lows expected of 30F Thursday night, 28F Friday night and 28F Saturday night. Daytime highs expected of 39/40F Friday through Sunday. A near freezing wintry mix is predicted Thursday through Friday night which could make a fast time Friday more difficult than Saturday/Sunday if the predictions hold.

Glidewax: Apply Base Performance Red Hot Wax, scrape and brush. Spray on Base Performance Yellow Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Yellow Hot Wax, scrape and brush.

Gripwax: NA

Structure: A universal structure covered by one pass with the Red Structurite tool followed by a pass with the Yellow Structurite tool after scraping and brushing the Hot Wax or before spraying BP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
