

WAX RECOMMENDATION **TOKO**[®]

Ultratune DownDuro

Chickadee Trailhead, Winthrop, Washington

Monday/Tuesday March 1st and 2nd, 2021

Self Timed Downhill Event Opening Days NEW EVENT

Wax tip for March 1st and 2nd Assuming an 8AM Start

Approx 7K Freestyle Technique See website info

<http://www.methowvalleynordic.com>

Forecast/Conditions: Clean, fully transformed and firm 44" snowpack groomed daily by PistenBully exists. Overnight lows of 25F and 23F for Sunday and Monday followed by daytime highs of 37F expected. With insignificant or no amounts of new snow expected, will make this downhill race set some speed records if you choose the best route!

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Red Liquid Paraffin, let stand overnight or longer, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply BP Red Hot Wax, scrape and brush.

Gripwax: NA

Structure: A universal structure on a stiff ski covered by one pass with the Red Structurite tool after scraping and brushing the Hot Wax or before spraying BP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If an event allows fluorinated waxes and you choose to use them, use High Performance or Performance (Liquid Paraffin or Hot Wax) of the same color (Yellow, Red or Blue), as the temperature ranges are the same. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
