# TIMING INSTRUCTIONS

STEP 1: Download the App

Download the app shortly before your race so you have the most updated version.

Download from
- Apple App Store
- Google App Store

You need good connectivity or internet to download the app . Download the race ahead of time because of spotty connectivity on the trails.
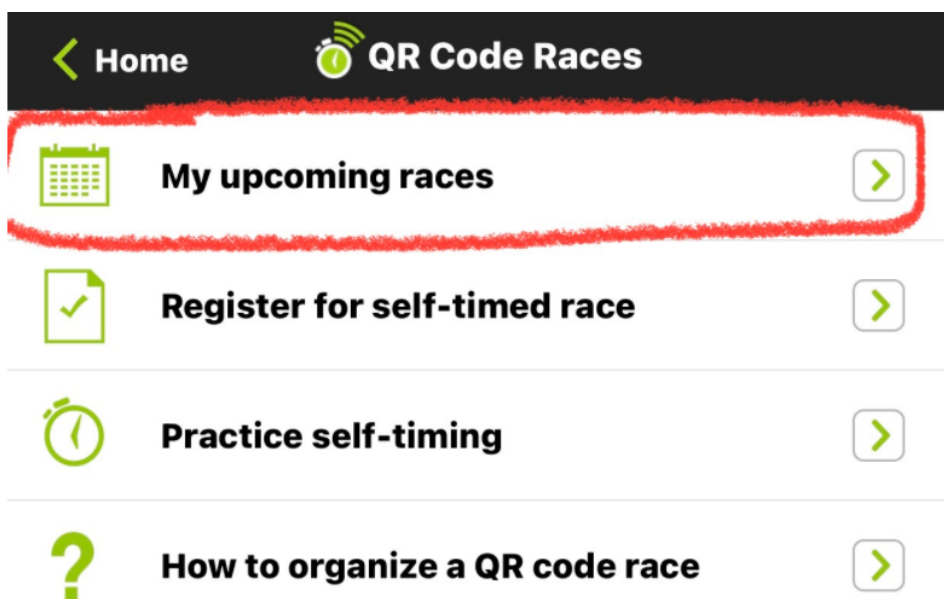

STEP 2: Select
Race With Self Timing

Once the app is open, selct:

STEP 5: Scan QR Code

- Your phone's camera will open the following window
- It is waiting for you to scan the code
- The race start time begins as soon as you scan the Start QR code

Scan code for Start   **>**

NOTE: As soon as you scan the start QR code, **your race will start!**

The start QR code will be on a map sign in the area of the start and the same with the finish - they will look similar, but not identical to the ski to the sun timing signs.

STEP 7: Scan Finish
QR Code

If you are connected to the internet, your result should upload automatically. If you are not connected to the internet, be sure to upload your result the next time you are.

TROUBLE SHOOTING

If you have trouble scanning the QR code, select the following options:

Record time without code

Scan code for Start

Record time without code.

**The race organizer will be notified that no QR code was detected.**

TIPS FOR A SUCCESSFUL RACE

- Keep your phone warm when you are skiing.
- Fully charge your battery before you go.
- QR codes scan better when you are a few steps back from them (you do not need to be super close.)

Practice Self-Timing There is an option to practice timing yourself with the QR code system within Webscorer. While this is not necessary, it is an option if you would like to try out the system before you start your race.

FINAL NOTES

Please use your smart device to record your start and stop time with the QR code.
